STANDARD OPERATING PROCEDURE

No.	Description	Page	Revision
	1. The purpose of this procedure is to ensure that all personnel are aware of the correct procedures for handling hazardous materials. This includes the identification, labeling, storage, and disposal of these materials. It also covers the use of personal protective equipment (PPE) and the procedures for emergency response in the event of a spill or release. This procedure is intended to be used by all personnel who work with hazardous materials in the laboratory. It is the responsibility of each individual to read and understand this procedure and to follow it at all times. Any deviations from this procedure should be reported to the supervisor immediately. This procedure is subject to change without notice. The most current version of this procedure is always the one to be followed.
